

Orinda's Windsor Chair Guy—George Lucido

... continued from page D1

"I like to keep it as authentic as possible. All of the chairs were built the original way using the original tools," says Lucido. When unable to find a domestic source for an English travisher, a convex woodcarving tool used for shaping the chair's seat, Lucido made one himself. He smiles when pointing out the exception – he admits freely to using an electric-powered lathe versus the pedal-powered lathe employed in the early days.

The wood and paint he uses are also original. The chair seats are made with East-

ern white pine sourced from the East coast, and the rest of the chair is made with freshly cut Modesto Ash, a tree common to the Bay Area with wood that has a very straight grain, so it bends easily and works well for the curved pieces on the chair back. Lucido covers the chairs with two coats of milk paint (an all natural product), first red then black. "When the chairs were first made, they were mostly painted red because that pigment was more readily available and then in later years re-covered with black paint," explains Lu-

cido. He burnishes the black layer to create a shiny and silky smooth surface and leaves streaks of the rustic red peeking through at the edges.

Lucido's woodworking craft is in large part self-taught, and he has kept busy sharing his knowledge. He volunteers time in the advanced woodworking class at Campolindo High School, and he occasionally gives talks to community groups about his craft.

"It's a really fun hobby. I'm out here in the workshop seven days a week," he says, "It

doesn't give me the frustrations that a relaxing day on the golf course used to." And as a reminder, should he be tempted to forgo the woodshop and return to the links, Lucido has his driver prominently displayed over the doorway of his workshop—and that's where it will stay, says Lucido..

George Lucido also does wood furniture repair. You can reach him at his studio at (925) 254-3659 or via email at sawdustman1@comcast.net.

More About the American Windsor Chair

Like many of the things that migrated with the early colonists, Windsor chairs were remade with an American twist. In England, chair makers were required to belong to a guild, which dictated the chair design and amount to be charged. The colonists quickly discarded the old world constraints and created their own chair designs, and the seven varieties of the American Windsor chair were born.

So why were they called "Windsor" chairs? As one story goes, King George was hunting and took refuge from the rain in a farmer's house in the woods. While there he sat in the farmer's chair and found it so comfortable that he ordered several identical chairs to be produced for his home, Windsor Castle. (George Lucido finds this explanation a bit far-fetched.) More likely, the name stems from the fact that the chairs were first made in Windsor, England, an area where many of the woods used could be sourced.

The quintessentially American Windsor chair has been seen throughout the United States' brief history and carries a democratic provenance.

- George Washington was a devoted Windsor chair collector and had 27 Windsors at his Mount Vernon home.
- Thomas Jefferson wrote a draft of the Declaration of Independence while seated in a Windsor.
- When the Declaration of Independence was signed in Philadelphia on July 4, 1776, the assembly sat in Windsors.
- Washington's officers sat in Windsor chairs at Fraunces Tavern in New York City to listen to his farewell speech.

George's Bowls and Vessels

People call George Lucido when a tree falls. "It happens all the time," he says. And when he gets a call, he gets to work right away (the wood must be harvested within a week) turning the dead tree remnants into beautiful and functional bowls. Lucido has collected wood from felled trees such as black acacia, black walnut, and birch, from all over Contra Costa County. After making the bowl, he allows it to cure for a year and then sands, oils, and polishes it to provide a bright, natural sheen.

Lucido also makes some very elaborately detailed bowls and vessels, which are more about art than function. The woodworker uses popular and exotic woods to recreate the designs of clay vessels from the Southwest. These bowls and vessels are sold at Valley Art in Walnut Creek and Gallery M in Half Moon Bay.
