

In 2010 and 2011 we offset our power usage by 44% and we saved about 65% on our power bill. That means that our investment will be paid for by our energy savings in less than six years. In moments of high production our meter runs backwards, but PG&E doesn't buy power back.

In the last two years the system needed no extra care or maintenance. We are very happy with our decision to install solar panels and would recommend them both for financial and green reasons.

This chart represents a typical energy production day in the summer. Most solar companies offer a monitoring system that tracks the daily, monthly and yearly production of a solar system.

The indoor inverter is mounted on a garage wall

ADVANCE TREE SERVICE & Landscaping

Family owned in Moraga since 1987

Your friendly neighborhood arborists Darren and Lew Edwards

TARGET ZONE

If a tree fails in a field, damages would be minor. But if it fails and strikes a person or property the consequences would be severe. The risk of an ISA certified arborist from Advance Tree Service assess and considers both the likelihood of failure and the likelihood of impacting, the identified targets. The target zone for dead trees is larger than those with live, flexible branches, because dead and brittle branches are more likely to shatter on impact spreading debris.

So don't wait until it's too late, call your local ISA certified Arborist at Advance Tree Service and Landscaping to help you be safe.
