house, water pump and piping installation is nearing completion and roofing is now underway.

EBMUD says it will be working on Saturdays through the summer to complete on time as a result of the wet winter. Saturday work hours will be from 7 a.m. to 5 p.m. with any louder activities starting after 8 a.m. Regular weekday work hours are from 7 a.m. to 7 p.m.

Once the new plant is online and pumping water to the community the old plant will be taken out of service and demolished.
