

Current trends in home remodels

... continued from page D8

White walls and trim create a timeless look and blank slate. Black hardware is most common for the whitest white shades while bronze hardware is prevalent with slightly off shades of white.

One of the Martin team's recent Lafayette remodels showcases many of these details: walls were knocked down to create an open floor plan between the living room, dining room, kitchen, and straight through to the family room. Carpets and various tiles were replaced with uniform hardwood floors, and walls, ceilings, and fireplace were simplified to white.

Another of the Martin team's Lafayette renovations involved a complete overhaul of the kitchen with high-end appliances, shiplap walls, a large kitchen island, shaker cabinets, and white surfaces. The updated bathroom illustrates details like bronze hardware, shiplap walls, wood flooring – and of course white.

With such simple, clean choices, remodel updates like this may even transcend trendiness and last forever.
