Pipes with holes can be lined with trenchless technologies like Cured-In-Place Pipe, or CIPP. Any corroded bottoms will have inverts resurfaced with concrete to maintain water flow. Finally, buckled pipes can be spot repaired by removing and replacing sections of the damaged pipe.

Inspections (through manholes, inlets, outfalls, etc.) and closed-circuit television videos of pipeline are expected to be complete in five years. The next step would be to prioritize the

maintenance repairs.

At this point in time, Moraga's Storm Drain Operation and Maintenance Program is fully funded. The program's elements of video inspection, sediment/debris removal, technical assistance, maintenance repair and asset management software comes to \$254,400. Project costs for 2019 are \$170,000. Any costs to continue the program into the future remain at a steady \$170,000. Preventative maintenance, in the long run, is cost effective.
